

Nursery Catalog Spring 2011

Nursery Hours of Operation:

**Mondays thru Fridays 8am-5pm
Saturdays 8am-3pm (Seasonally)**

New Aggressive Pricing sets Clearwater Apart from Other Garden Centers and Nurseries. We offer a wide variety of perennials, shrubs and trees to retail customers and landscape contractors. Clearwater's nursery manager and staff take great care in maintaining some of the finest plant specimens in the region.

Welcome to Clearwater Landscape & Nursery.

In our 22nd anniversary year, we are proud to issue our new plant catalog for your ordering convenience. As you will see, the catalog offers our regularly stocked items at very competitive prices. As always, our goal is to offer the best product and service possible. Contact our office during business hours to ask any questions regarding the available materials. You may place your order by phone, fax, or just stop by. We are excited to serve you with all of your landscape needs.

We thank you for your patronage and wish you all the best this growing season.

Holly, 'Nellie Stevens':
Large evergreen pyramidal tree; 15' x 10' with red berries in the fall.

#25	5.5-6'	\$150.00
B&B	8-10'	300.00

Holly, 'Oakleaf':
14' x 8'; small evergreen tree with maroon colored new growth; pyramidal in habit; sun/pt shade.

B&B	7-8'	\$230.00
B&B	8-10'	300.00
#30	5-6'	135.00

Holly, 'Opaca':
Symmetrical, dense, wide pyramidal form; spiny, dull green leaves are accented with clusters of red berries which persist throughout the fall and winter.

B&B	6-7'	\$175.00
B&B	8-10'	350.00

Spruce, 'Norway':
Fastest growing of the spruces; develops strong graceful branches that are covered with dark green needles; coniferous.

B&B	5-6'	\$100.00
-----	------	----------

Holly 'Nellie Stevens'
Detail of the spiny, dark green leaves and round red berries of the 'Nellie Stevens'.

Basic Plant Care Instructions:

Name/Description

Unit Price

The following instructions are guidelines for the care of plant material & should be closely followed to encourage plant health and vigor*:

Watering:

Water is the single most important factor in the establishment of newly installed plant materials. It is imperative that the soil directly around the root ball remain moist during the initial growing season. The amount of water applied will vary according to a number of factors; however, as a general rule, water each plant with an un-nozzled hose until water begins to puddle around the plant's base. Never assume that the plant is either dry or wet. Simply move aside the mulch from the base of the plant and feel the soil. If it is cold and moist, no water is needed at that time. Once plants have established, watering should only be needed during periods of drought.

Fertilization:

Upon installation all plant material should be fertilized with a slow release, balanced fertilizer. Clearwater Landscape recommends reapplying fertilizer each fall with approximately 4 oz. of balanced fertilizer. This will help promote vigorous growth the following spring. Carefully read and follow the label directions of the fertilizer you use.

Pruning:

Pruning is necessary to ensure the aesthetic value of some plants and to promote satisfactory growth. Pruning should not be needed until the following season. The primary function of pruning is to maintain or reduce plant size and remove undesirable (diseased or broken) branches, as well as promote growth for a more dense appearance. As a general rule, prune flowering shrubs after they bloom.

Weeds:

A pre-emergent herbicide can be used at the time your landscape is installed. Some weeds, however, will resist the effects of the herbicide and should be removed as soon as they appear. Allowing weeds time to establish will increase their populations and make their removal more difficult. If you should develop an uncontrollable weed problem, please contact us for recommendations.

Mulch:

Re-mulch your landscaping as necessary to maintain a layer of mulch. This will help inhibit weed, retain moisture, decrease rapid changes in soil temperature, and give your landscape a fresh, clean appearance. Re-edging of bed lines will further enhance your landscaping.

* Results are not guaranteed! Only plants installed by Clearwater carry a warranty. Call for installation prices.
